

## Company Profile

In 1976 Metronix was founded in Braunschweig by Dr. R. Karmann. First focus of business activities was the development of electro-magnetic measuring instruments for geophysical applications. A business segment which is a big topic today. The devices are used for the search of natural resources, i. e. for new sources of crude-oil, natural gas or ore. Worldwide Metronix is the second largest manufacturer of this special technology.

Our present studies are related to magnetotellurics (oil, gas, mineral exploration), atmospheric studies (PEJ, Schumann resonances) and submarine exploration.

Metronix was organizer of the international conferences "Minerals and Electromagnetics", Berlin 2001 and "Deep Soundings and Crustal Studies", Hamburg 2005.

We are member of the "Academy of MT Sciences".

President: Dr. Krüger

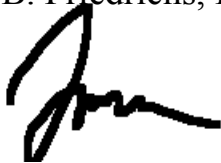

Employees: 70
